Hospital Infection Control
1992 Index

AIDS (see also Human immunodeficiency virus)
education on available at training centers, SEP:126

American College of Surgeons
challenges OSHA standard enforcement in OR, NOV:147

American Dental Association
sues to block OSHA standard, APR:49
American Hospital Association
briefing answers questions on OSHA standard, MAY:64

American Medical Association
clashes with medical boards on HIV policy, MAR:38
develops training for OSHA standard, MAR:42
issues policy on HIV-infected providers, SEP:125

Anaphylactic shock
in workers and patients due to latex, JUL:89

Anesthesia breathing circuits
reuse of not linked to infections, MAR:41

Animal-assisted therapy
no infection associated with dogs in program, DEC:162

Aspergillus
engineering to lower nosocomial risk of, JUL:94

Association for Operating Room Nurses
sharps policy calls for neutral zones, NOV:149

Association for Practitioners in Infection Control
protests Joint Commission standards revision, SEP:122

Centers for Disease Control
cites low suspicion, poor isolation in TB outbreaks, JUN:79
issues national action plan to combat TB, JUN:77
lets guidelines stand on HIV-infected providers, AUG:105
reconsidering ultraviolet light for TB, MAR:37
reports HAV outbreak from unsuspected source, JUL:96
reports HIV infections during nuclear medicine, OCT:136
reports septic reactions to platelet transfusion, APR:54
revises guidelines on providers with HIV and HBV, JAN:11
studying "toxic" reactions to Group A strep, MAY:57
surveillance by for occupational HIV questioned, MAY:61
tracking dramatic upsurge of MRSA, MAR:29

Environmental Protection Agency
charged with underestimating cost of waste tracking act, MAY:70

Florida HIV dental case
handpieces as possible explanation of, MAY:68
update, DEC: Supplement

Food and Drug Administration
needle safety alert by hailed, JUL:92

Gloves
use of causes latex reactions, JUL:89

Group A streptococcus
"toxic" reactions due to under study, MAY:57
virulent strain of may be in decline, DEC:164

Guest columnist
computer tracking of needlesticks, DEC:166

Hepatitis
CDC changing guidelines on providers with HBV, JAN:11
CDC stays with old guidelines on providers with HBV, AUG:105
HAV outbreak from unsuspected source, JUL:96
OSHA standard requires free HBV vaccination offer, JAN:9
transmission of HBV in dermatology office, APR:50

Human immunodeficiency virus (see also AIDS)
AMA, medical boards clash on providers infected with, MAR:38
annual toll of health care workers infected with, OCT:133
CDC revises guidelines on providers with, JAN:11
CDC surveillance for occupational infection with, MAY:61
exposure to during nuclear medicine, OCT:136
risk of pushes needle safety devices, OCT:129
seroconversion following needlesticks, FEB:20.

Immunization
low rates of for flu contribute to outbreaks, MAY:69
OSHA standard requires offer of for HBV, JAN:9

Infection control practitioners
importance of on product evaluation committees, DEC:157
play key surveillance roles after hurricane, NOV:154

Influenza
low immunization rates contribute to outbreaks, MAY:69

Joint Commission on Accreditation of Healthcare Organizations
APIC protests standards revision by, SEP:122
field testing clinical indicators, APR:51
letter by explains standards revision, SEP:123

Journal Review
(Usually appears monthly. Articles cited in each column are not listed in this index.) See FEB:27; MAR:43; APR:55; MAY:72; JUN:87; JUL:99; AUG:112; SEP:127; OCT:139; DEC:166

Legionella pneumophila
outbreak of traced to broken chlorinator, JUL:97

***Methicillin-resistant* Staphylococcus aureus**
CDC tracking dramatic upsurge of, MAR:29
controlling through patient education, AUG:109
guidelines for emphasize basics, MAR:34

MMWR Update
amantadine use for influenza A, FEB:25
cases of non-HIV immunosuppression, OCT:138
flu vaccination strongly encouraged, NOV:153
food service inspections for salmonella, JAN:15
no other reports of HIV transmission to patients, AUG:111
rabies contacts pose little risk, FEB,24
record increase of TB, APR:53
TB should be rapidly reported to health departments, JUL:98

Multidose vials
can be used safely with precautions, JUN:85

Mupirocin
used to reduce *Staphylococcus aureus* carriage, MAR:35

Needlesticks
box placement, injury feedback reduce, FEB:22
change to devices to prevent inevitable, OCT:129
cost issue in trying to prevent, JAN:6
devices designed to prevent listed, JAN:7
hospital ends grievance over device to prevent,FEB:25
OSHA encourages engineering controls to prevent, JAN:9
research on needle safety designs continues, JAN:1
safety alert on by FDA hailed, JUL:92
surveillance for using computer and forms, AUG:108

Occupational Safety and Health Administration
ADA sues to block standard by, APR:49
AHA briefing answers questions on standard by, MAY:64
begins TB inspections to protect workers, AUG:101
California calls for state TB standard by, OCT:135.
clarifies bloodborne pathogens standard, MAR:42
enforcement plan for standard by, JUN:80
inspection procedures for standard by, JUN:82
regulatory era begins amid controversy, APR:45
standard by calls for sharps safety, HBV vaccination, JAN:9

Operating room
AORN sharps policy calls for neutral zones, NOV:149
ACS challenges OSHA standard enforcement in, NOV:147
blood exposures in raise questions, NOV:141
program reduces injuries in, NOV:145

Phlebotomy
needlesticks during lead to HIV, FEB:20.

Product evaluation
increasingly important in era of new devices, DEC:157

Q & A on infection control
chicken pox and zoster pose different risks, JUN:86
multidose vials can be used safely, JUN:85

Readers Write
IV nursing standards emphasize infection control, FEB:26
routine use of IV filters questionable, MAY:67

Streptococcus pyogenes
"toxic" reactions due to under study, MAY:57
virulent strain of may be in decline, DEC:164

Surveillance
for needlesticks using computer and forms, AUG:108
ICPs play key roles in after hurricane, NOV:154

Transfusion
reactions following due to contaminated platelets, APR:54

Tuberculosis
California resolution calls for standard on, OCT:135
checklists for policies on, SEP:119
complex problems hinder control of, JUN:73
follow-up after exposures to, NOV:150
low suspicion, poor isolation spur outbreaks, JUN:79
national action plan to combat, JUN:77
New York hospitals struggle against, FEB:17
OSHA begins inspections to protect workers, AUG:101
rapid test for under study, SEP:117
ultraviolet light as a control for, MAR:37

Unions
urge wide use of sharps safety designs, JAN:1

Universal precautions
demographic factors affect compliance with, MAR:41

Vancomycin
concerns over emerging resistance to, MAR:29

Ventilator circuits
researchers say routine changes of a costly ritual, SEP:113

Voluntary Hospital Association
charges EPA with underestimating waste tracking act, MAY:70

Viral gastroenteritis
nosocomial outbreaks of call for rapid intervention, APR:52

Need back issues? Call our order department at (800) 688-2421; inside Georgia (404) 262-7436.
